Reza Khosroshahi
Senior Frontend Engineer

SKILLS

React	9	JavaScript	9	TypeScript	6	Redux	6	React Query (RTK)	3
Panda CSS	3	Next.js	4	Jest	8	Git	10	REST API	8
Cypress	6	SQL	2	No-SQL	2	Node.js	2	Kubernetes	2
Storybook	4	Docker	4	Figma	5	CI/CD	2	HTML CSS	10

* Numbers indicate **years** of experience.

WORK EXPERIENCE

Senior Frontend developer - Jan 2023 – Present
SNAPP - Fulltime
Ride-sharing and transportation platform (Uber/Lyft-scale) serving 40M+ users across the Middle East

- **Shipped** in-app chat (**EMQ**, **Socket.io**) adopted by **100K** users on day-one; built and maintained core ride-sharing frontend used by millions.
- **Drove** frontend architecture: migrated from flat structure to **feature-based** layout—improved maintainability and onboarding for the team.
- **Reduced bundle size** by replacing **CSS-in-JS (styled-components)** with **Panda CSS** in the shared UI kit; achieved **tree-shakable** styling and faster loads.
- Partnered with Product to **design** and **ship** in-app location search (lat/long); **5K** uses on first day of release.
- **Owned** production deployments via **OpenShift** and **Argo CD**; ensured reliable, zero-downtime releases.

Chapter Leader Frontend - Mar 2021 – Jan 2023
ArvanCloud - Fulltime
Cloud and infra platform (Cloudflare/AWS-style) serving 1K+ B2B customers

- **Built Micro Frontend** platform for panel.arvancloud.ir using **Webpack Module Federation**—enabled independent deploy pipelines and staging/production per micro-app.
- **Developed Arvand** design system in close collaboration with UI/UX; delivered via **Storybook** to document components, variants, and usage for cross-team adoption.
- **Led** frontend chapter: owned delivery, **delegation**, and communication; ran **1:1s**, **iteration planning**, and **retrospectives**.
- **Drove** technical direction and **strategic** choices with CTO and frontend tech leads (e.g. **Micro Frontend** architecture), aligning frontend with product goals and company-wide scalability.

Senior Frontend developer - Aug 2019 – Mar 2021
ArvanCloud - Fulltime

- **Cut** main bundle from **4MB** to ~**1MB**: trimmed unused **npm** deps, introduced **shared components**, and **refactored legacy** code into a clearer structure.
- **Hired** and onboarded **6** senior/mid front-end engineers; led technical interviews and bar-raising.
- **Integrated Sentry** for production monitoring and faster incident triage.

Frontend developer - Feb 2016 – Aug 2019
Kamva - Fulltime
E-commerce and shop-builder platform (Shopify-style) in Iran

- **Built SSR** storefronts with **React**, **Redux**, **Redux-saga**, and **Node.js**—dynamic shop pages and integration with bank payment gateways.
- **Developed** and **maintained** a **React** admin panel for merchants to manage orders, products, and their online shops.
- **Shipped** a **drag-and-drop theme editor** so merchants could customize shop layouts and styles without code.
- **Developed** internal tooling (**Express**, **MongoDB**) for team workflows; applied **Webpack** and **SSR** patterns across the stack.

EDUCATION

Payam Noor Iran, Tehran University   2012 - 2016
Bachelor of Engineering in Computer Science and Engineering
